Subject: Opposition to the Bank of Wal-Mart

Dear Chairperson,

I feel once Wal-Mart is allowed to enter into the world of full-service banking in the United States of America, then turn on their full competition lever. They will slowly destroy all of the smaller banks in this country, and then begin to become the largest banking entity in our country. Since Wal-Mart and the Communist (did I say Communist?) government of China are fellow bed-partners in so many economical and financial matters -- it doesn't take much to see how, in the end, any American banking with Wal-Mart, will be, inadvertently supporting the Communist (yes, COMMUNIST) government of China. Just as we are currently doing so by purchasing anything with the label: Made In China.

Thank You.
